

Kentico Intranet and Collaboration Solution

The unsung heroine of effortless productivity!

The Kentico Intranet and Collaboration Solution makes empowering workgroups and project teams a hassle-free opportunity for everybody. The simpler, faster way to smarter working.

**Not as sexy as websites.
But just as profitable.**

Moving from knowledge silos to a collaboration network demands that you make sharing ideas, sharing documents, and sharing responsibilities easier than sharing a coffee. Delivering far more proven out-of-the-box functionality, the Kentico Intranet and Collaboration Solution makes light work of building, using and managing intranets by replacing expensive coding with simple configuration and customization. And because Kentico rejects the pricing models so beloved of other vendors, the Kentico Intranet and Collaboration Solution helps you deliver brilliant intranets against the odds. Intranets just got sexy again.

Say yes!

Get more out-of-the-box. For less out of the pocket.

Goodbye, file chaos!

Manage files, permissions, workflows and multiple languages within document libraries.

Get (and stay) in control

Divide work into projects and tasks and assign to specific users. Monitor progress with reports and notifications.

Clear cooperation

Create a place for project collaboration, both internally and externally, with easy-to-manage workgroups.

Never lose track

Keep on top of updates and compare document versions. Roll back to previous versions or archive what you no longer need.

Keep it together

Display your SharePoint content and documents on your Kentico intranet to leverage its full range of features.

Share the knowledge

Build wiki-like website and intranet sections where visitors and employees can share expertise and knowledge.

So when they want a simpler way to smarter working, what do you say?
